

Placement title: Junior Developer Intern

Remuneration: Daily travel and lunch allowance

Start date: Immediate

Duration: 3-5 months

Placement type: Full time

Location: Shoreditch, London

We are looking for an enthusiastic and self-motivated student to work as part of our technical team from our office within the heart of the Silicon Roundabout area of London. It is a perfect opportunity to learn about developing on mobile platform and to be involved with numerous projects.

Qualifications and skills:

- currently studying or recently completed a degree course in Computer science or similar
- highly motivated and results oriented behaviour
- keen interest in mobile apps and software development discipline
- preferably have understanding of SQL, XSL, XML, REST, SOAP APIs and applications with development frameworks
- strong analytical skills and self-starter with ability to take ownership for tasks and assignments
- good spoken and written English.

Your responsibilities will vary depending on your interests and skills. The responsibilities could include assisting with app development projects on iOS and Android platforms, graphic design/HTML updates, writing test plans, manual testing, tracking defects and fixes.

During your time at mkodo you will gain insight into the mobile media and development sector and acquire valuable work experience in a dynamic environment within a leading mobile services provider.

Mkodo is a proven supplier to the mobile betting and gaming sector with market leading mobile solutions. Our award-winning product, the Intelligent Mobile Platform, has been used in successful mobile channel activities since 2001 by blue chip clients such as BSkyB, Rank Interactive, Grolsch, Blockbuster, Proximity, BBC and Turner Broadcasting across Europe and North America.

If you are interested in the position please email your CV with Covering letter to jobs@mkodo.com.
